What is this product?

Type

The SICAV is a Luxembourg Investment company subject to the provisions of Part I of the Law of 17 December 2010, relating to undertakings for collective investment in transferable securities (UCITS).

Term

There is no maturity date. The Sub fund can be liquidated or merged into other sub-funds under the circumstances and following the procedure described in §24 of the Prospectus.

Objectives

Investment objective The aim of the Sub-Fund is to offset the erosion of purchasing power due to inflation in the Eurozone over time, also promoting environmental, social and governance characteristics on the investments (ESG factors), as per Article 8 of the SFDR and mitigating the relevant sustainability risk.

Investment policies The Sub-Fund invests in at least 70% in inflation linked bonds denominated in European currencies with a preference for bonds issued by governments; up to 30% in non inflation linked bonds; up to 15% in commodity-linked financial instruments.

Investments in corporate bonds will not exceed 25% of the net asset value of the Sub-Fund and non investment grade and not rated investments are not allowed. Exposure to CoCo bonds shall not exceed 10% of the net asset value.

Derivative instruments, which are financial contracts whose value depends on the market price of a reference asset, can be used also for investment purposes provided that the total commitment does not exceed, at any moment, 30% of net asset value of the Sub-Fund. In order to mitigate exchange rate risks, the main currency positions are hedged against the Euro. Overall, investments for which the exchange rate risk against the Euro is not hedged shall not exceed 10% of the net asset value.

The "ESG features", according to art.8 of EU Regulation 2019/2088, are implemented through a two-level approach:

1. an average portfolio ESG rating, determined as described in the Paragraph Disclosure on "ESG integration" practices of the Prospectus, which will be equal or over the quarterly weighted average ESG rating of a specific synthetic index indicated in the Appendix of the Sub-Fund
2. a set of specific restrictions and investment limits identified to promote sustainable investments.

Benchmark 80% B-Barclays euro Govt inflat 3-5 y TR (BEIG0T); + 20% B-Barclays Euro Floating rate TR (LEF1TREU)

Benchmark uses Discretion is allowed with respect to the benchmark. The Investment manager may invest in financial instruments not included in the benchmark in order to take advantage of specific investment opportunities. This active management approach involves a deviation from the reference index which can be significant.

The Sub-Fund is not intended to track the benchmark

Redemption and Dealing Investors may redeem their shares on any business day for Luxembourg banks. They can also switch some or all their shares in those of another Sub-Fund and/or Class (with the exception of Class "L") within the SICAV without paying any extra fee.

Distribution Policy A dividend equal to the annual average of the 3 months Euribor (daily data) + 70 bps is distributed on a yearly basis regardless of the performance of the Sub-Fund. A minimum dividend of 0,50% will be anyway processed.

Intended retail investor

This share class is intended for Institutional investors only, with a medium-term investment horizon and with preference for products complying with the ESG factors.

Practical information

Depository The SICAV depository is State Street Bank International GmbH, Luxembourg branch.

Further information A copy of the Prospectus, the latest annual and semiannual financial report of New Millennium are available free of charge in English and Italian on the websites www.natam.lu, www.newmillenniumsicav.com and at the registered office of the Fund (17, Boulevard de Kockelscheuer, L-1821 Luxembourg). Also the latest Net Asset Value per share are published on www.natam.lu and www.newmillenniumsicav.com

The information contained in this document is specific to Inflation Linked Bond Europe. However, the Prospectus, annual and half-yearly reports are prepared for the SICAV as a whole.

The SICAV consists of separate Sub-Funds with segregated liabilities. This means that the assets of a Sub-Fund will not be available to meet the claims of a creditor made against another Sub-Fund.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the

product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This means that potential losses due to the future performance of the product are rated a low level and that adverse market conditions are very unlikely to affect the sub-fund's ability to return the initial capital.

This product does not include any protection from future market performance so you could lose part or all your investment. The significant risks not detected by the synthetic indicator, are detailed in the "Main risk factors" section of the relevant Sub-Fund Appendix of the Prospectus.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between September 2016 and September 2020.

Moderate: this type of scenario occurred for an investment between November 2017 and November 2021.

Favourable: this type of scenario occurred for an investment between March 2020 and March 2024.

What happens if NATAM Management Company S.A. is unable to pay out?

In the event of Natam's insolvency, the assets of the SICAV will not be affected. The assets of the SICAV are held in safekeeping by the Depositary, that is required by law to segregate its own assets from the assets of the Sicav.

If the fund is not able to pay you out what is due, you may lose your entire investment. Losses are not covered by an investor's compensation or guaranteed scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

■ 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 4 years (recommended holding period)
Total Costs	104 EUR	416 EUR
Annual cost impact*	1.1%	1.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.1% before costs and 1.0% after costs.
